

Presented By: Dawn Edmonds

- What is Farm Credit East and what services do we provide?
 - A non-depository farm bank
 - Operating, Capital, and Farm Ownership Loans
 - Services offered to Ag Businesses:
 - Tax preparation, consulting, appraisal services, leases, financial records, payroll services, crop insurance

- Farm Operations Vary greatly:
 - Some sell only one product
 - Some sell only one type of product:
 - Grain
 - Corn
 - Soybeans
 - Wheat
 - Some only sell in bulk and wholesale
 - Some have a wide variety of related and unrelated products
 - Some sell both wholesale and retail
 - Some sell processed crops, purchased items or by products as well
 - Pies donuts
 - Vegetables
 - Maple syrup
 - Mulling spices
 - Compost

- What does finance mean?
 - It is simply the management of money
- As owners you are the CFO of your business, and what does that mean?
 - You are responsible for the financial success or failure of your business

 Why are numbers important to your business?

- To know where you are
- To know where you have been
- To help determine your future

- Goal of your tax preparer:
 - Minimize income taxes paid
 - Accomplish this by shifting income or expenses into another income period or use special tax rules (accelerated depreciation)
 - May have trouble getting financing due to losses

- Why is profitability important?
 - Makes loan payments
 - Fund Building and Equipment Replacement
 - Fund savings and retirement accounts
 - Fund Future Expansion
 - Generates a return on your investment
 - And to make the business one that the next generation is excited to take over

Management Reports

- Profit and Loss Statement
- Accounts Receivable Aging Report
- Account Payables Aging Report
- Cash Flow Statement
- Balance Sheet

How Often Should you Review your Management Reports?

- Managers should review financial statements monthly to ensure:
 - Budgeted goals are being met
 - A/R & A/P are being paid and collected
 - Cash Flow Obligations are met without accumulating operating debt.

Year end reviews are usually too late to be effective.

- Financial analysis needs to focus on four main reports:
 - Income statement (aka profit and loss) income,
 expense, and net income
 - Balance sheet assets, liabilities, and NW
 - Cash flow statement sources of cash and uses of cash
 - The budget forecasts where you plan to go

Income Statement

Income Statement

- Uses/Goals
 - Shows if a business has a profit or not
- Income
 - Money flowing into the business
 - Ex. Sales, Collection of a crop insurance claim
- Expenses
 - Money flowing out of the business

Income Statement (Continued)

Two Types of Expenses:

- Variable: expenses that are directly related to the production of a product. Variable costs increase as production increases.
 - Examples: Supplies, Fertilizer, Chemicals, & Direct Labor
- Fixed: any expenses that a business incurs regardless of production.
 - Examples: Rent, Interest, Insurance, Officer's Salary

Balance Sheet

- Assets: the things your company owns that have a value (ex. Cash, Accounts Receivable, Equipment, Real Estate).
- Liabilities: money that the company owes.
- Good to Know Calculations:
 - Net Worth = Assets Liabilities
 - Working Capital = Current Assets Current Liabilities
 - Current Portion: One year of loan payments -interest paid

Successful Businesses have positive WC & NW

Working Capital

- Why is Working Capital Important?
 - Cushion for business losses
 - Shows you can cover debt for the next 12 mos
 - Options are limited with no WC

89												•		

- Has four main sections:
 - Income
 - Expense (variable and fixed)
 - Debt payments
 - Available funds in bank account

- What does the cash flow statement tell you?
 - ARE you going to have enough money at the end of the month to pay all of your obligations?!?!
 - If not how are you going to cover the short fall.

Farmer Jane

Jane is a local vegetable farmer. She triple crops 30 acres of land. She sells her produce through local vegetable auctions and local farmers markets. Last year she sold \$100,000 through the produce auction and \$42,000 through local farm markets. She also got a crop insurance claim of \$5,000.

Last year she purchased the following items to plant: tomatoes, bell peppers, and lettuce. Her expenses included \$1,500 advertising, \$7,000 chemicals, \$14,400 fertilizer, \$8,280 interest, \$1,900 trucking, \$9,100 fuel, \$23,000 labor, \$9,500 seed/ plants, \$13,200 supplies, \$3,300 utilities, \$6,800 repairs, \$4,250 insurance, \$3,500 rent, and \$11,780 other expenses.

As of 12/31 this is what Jane had left:

Jane had \$24,000 between her checking and savings account and \$29,000 in accounts receivables. All other assets include \$28,300 inventory, \$13,467 supplies, and \$13,467 prepaid expenses. Machinery and equipment totals \$75,000, and all land is valued at \$300,000.

Jane has a balance on her Operating line of credit with Farm Credit in the amount of \$30,000. All other debt includes \$10,868 in accounts payables, \$31,800 John Deere loan \$494.69/month (equipment purchase), \$20,000 International loan \$282.68/month (equipment purchase) and \$89,800 20 year Farm Credit Loan \$524.96/month (real estate purchase). For the purpose of this example, the interest rate for all loans are 0%.

A ggota.

- Proposal Process for a change to the business
 - Identify problem/opportunity
 - Describe favorable outcome
 - Offer alternatives
 - Recommend one of the alternatives
 - Identify resources and assistance needed
 - Must be realistic and sufficient time
 - Include timeline and deadline

Purpose –

- Test a business proposal/investment on paper before implementing it to be sure it will improve net income.
- ➤ Project the costs and returns resulting from an investment and calculate the effects on <u>net</u> income.

Partial Budgeting

- Appropriate for analyzing changes that affect only a segment of the total business.
- ➤Only considers the income and expense accounts that <u>change</u> if the proposal is adopted.

- Partial Budgeting Procedure
- ➤Outline the proposal in detail
 - Describe the investment
 - Determine the cost of the investment
 - Describe the anticipated results
- ➤ Make realistic assumptions
 - ➤Increase sales by 5%
 - ➤ Increase productivity by 5%
 - >Etc
- Calculate all costs and all returns

Proposal Worksheet

 \$	\$
\$	\$
\$	\$
\$	\$
\$	\$
Total \$	Total \$
Total added returns and reduced costs (A) \$	Total reduced returns and added costs (B) \$
A minus B equals change in	net farm income: S

Partial Budgeting Example

Farm Type: Retail Market

Gross Sales \$1,000,000

Net Worth \$500,000

Net Worth % 50%

Business cash flows debt with minimal excess cash.

Proposed Change:

- Enclosed, insulated 500 sq ft addition
- Cost \$100/ sq ft or \$50,000
- ➤ More product and displayed better

Assumptions:

- This will increase sales by 5% minimum.
- ➤ Need to buy/grow more product.
- ➤ Cost of money @ 6% = annual loan payment of \$11,500.
- ≥100 % financed.
- ➤ Historically earned 40% Gross Margin

Is this worth doing?

Changes to Business

Practical Approach to Partial Budgeting Identify what will: (annual basis)

➤ Increase income / reduce costs

```
$50,000 - sales - 5%
$_____
$
```

Total "Gains" - \$50,000

➤ Reduce income / increase costs

```
$30,000 – labor and production costs
based on 60% variable exp.
$11,500 – fixed expenses
$_____
```

Total "Losses" - \$41,500

Net Effect of Investment / Worth Doing?

<u>\$8,500</u>

Changes to Business

- Is this investment worth doing?
- Why or why not?
- What other factors in this example would you need to know?
- What alternatives would you suggest?

Changes to Business

Years Payback =

Investment Cost
Net Return/Income

5% Sales Growth <u>\$50,000</u> = 5.9Yrs 10% Sales Growth \$50,000 = 1.9 Yrs

\$8,500

\$26,500

Under 2 – great

Under 3 – good

Under 4- think again

TEST YOUR ASSUMPTIONS

Increase sales by <u>10%</u> or <u>\$100,000</u> total sales increase.

At (\$10 sales/customer) need 10,000 more customers.

Or,

Need 10% increase in sales per customer (\$1.00 based on 100,000 customers)

What is the annual financial breakeven point?

Is this realistic??

Business Plans & Financing

Why should I create a business plan?

- To show potential investors that you are prepared and serious
- Go through the thought process of all aspects of the new venture

- Create a Business Concept
 - Type of Business
 - Diversification from Competition
 - Brief Sketch of future goals
- Define Vision
 - What is the desired future state?
- Set Goals
 - Detailed, Realistic & Measurable

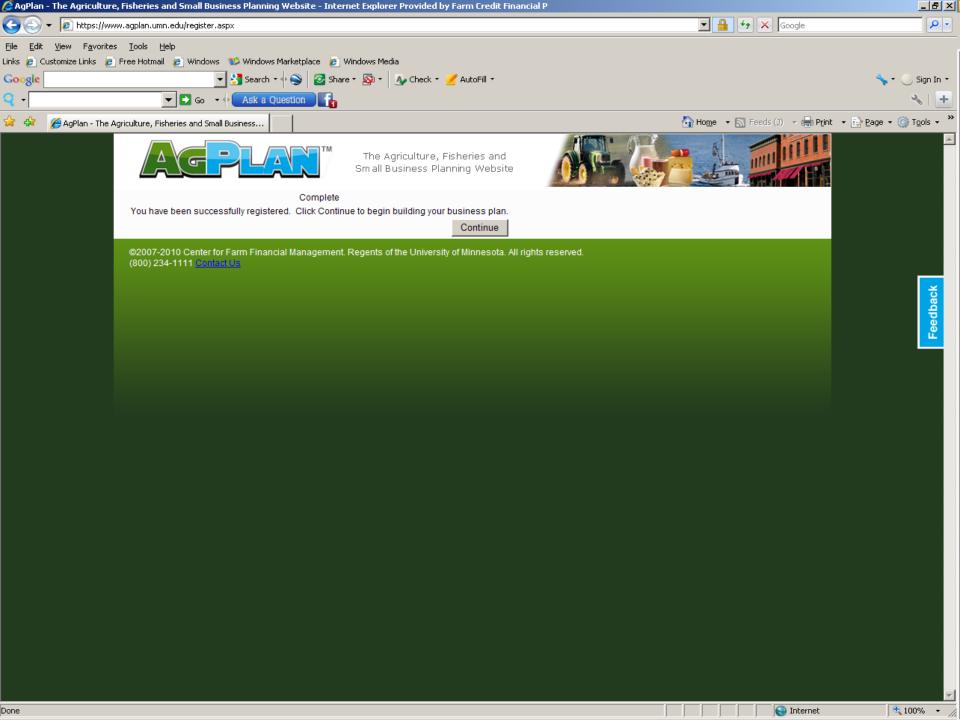

Components of a Business Plan:

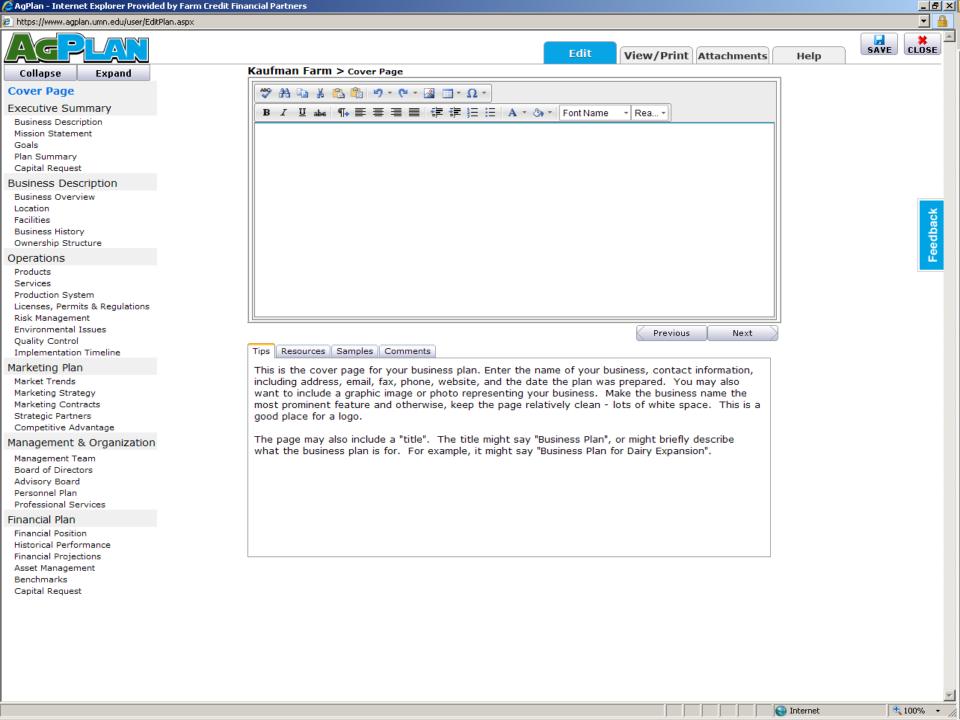

- Business Description
- Operations
- Marketing
- Management & Organization
- Financial

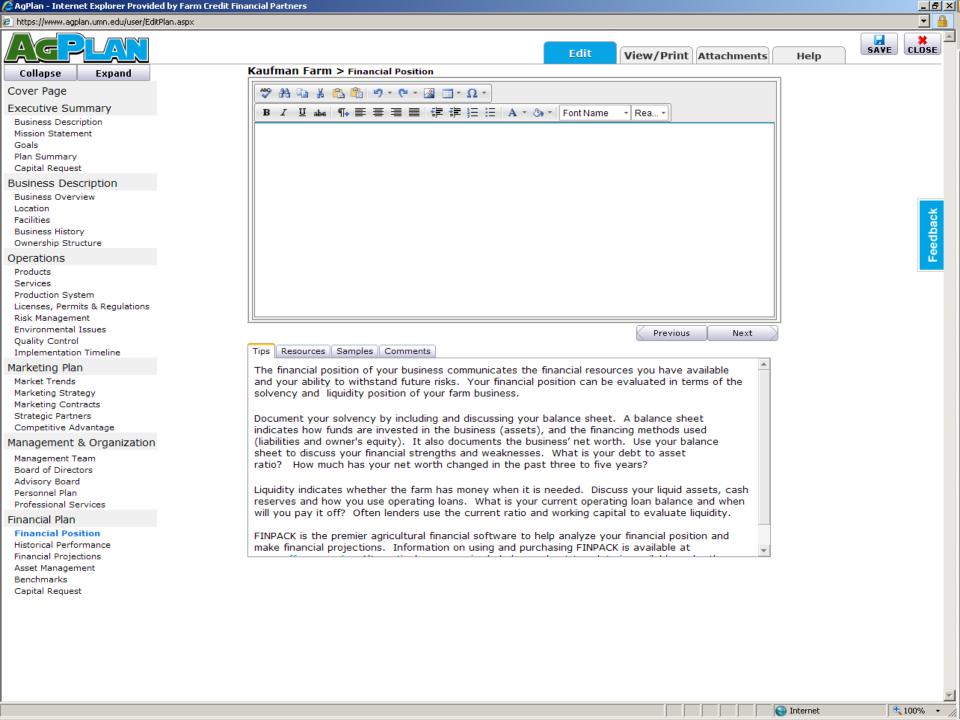

Get started today at:

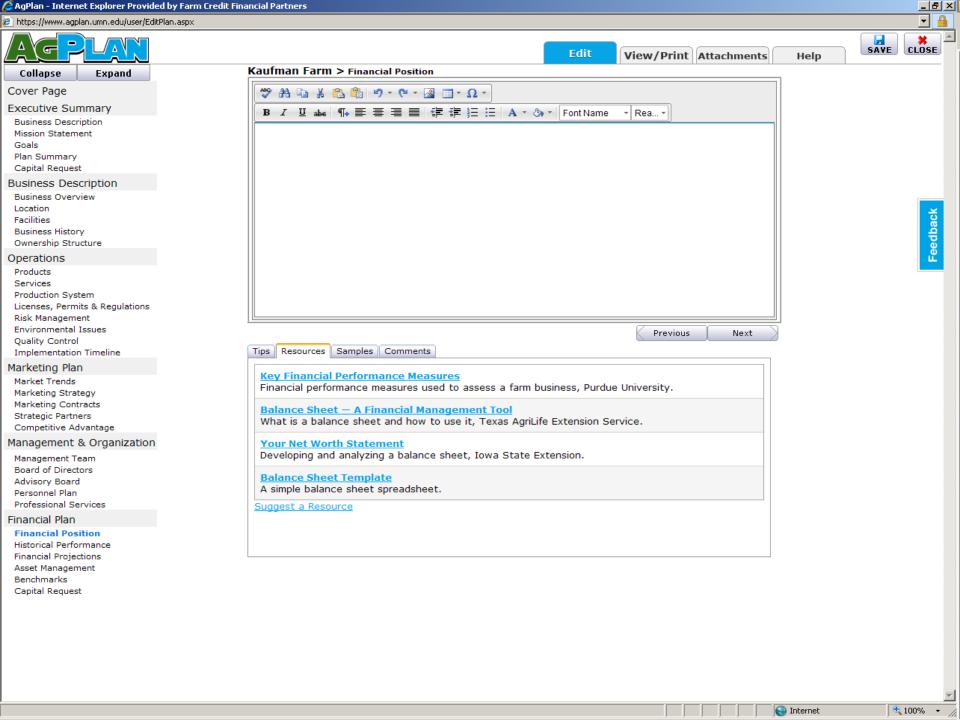

www.agplan.umn.edu

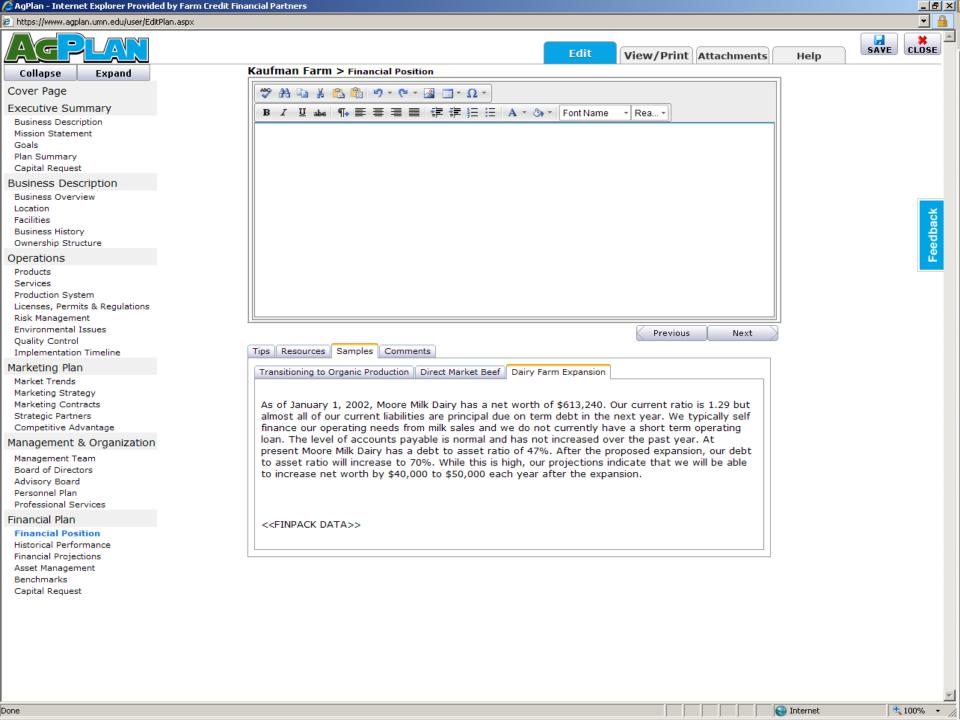

- Tips for Getting Started
 - Be Realistic in Budgets
 - May need three years to be profitable
 - Unlikely to make \$1,000,000 in your 1st year
 - Make sure to include all expenses
 - Make sure that your yields and prices are realistic
 - Cooperative Extension Office
 - USDA Ag Statistics

- Financial Plan
 - Financial Position
 - Historical Performance
 - Financial Projections
 - Asset Management
 - Benchmarks
 - Capital Requirements

- Financial Position
 - Resources & Ability
 - Balance Sheet
 - Assets
 - Liabilities
 - Document Net Worth
 - Discuss Strengths & Weaknesses
 - Debt to Asset Ratio

- Historical Performance
 - Trends from past 3-5 years
 - Net Farm Income
 - Debt Capacity
 - Income Statement
 - Explanation for major changes over the past few years

- Financial Projections
 - Investors & Lenders want to see:
 - Projected Cash Flow, Income Statement & Balance Sheet
 - Projected Cash Flow:
 - Can you meet expenses
 - Make debt payments
 - Survive the transition period

- Financial Projections
 - Projected Income Statement:
 - Once plan is fully implemented, it documents:
 - Income
 - Expenses
 - Profitability
 - Proforma Balance Sheet:
 - Evaluates how the plan will impact NW

- Asset Management
 - How do you plan to Acquire & Manage Assets?
 - Purchase
 - Lease (Describe lease arrangements)
 - Custom Hire
 - What are your Non-Farm Assets?
 - Give summary of investments:
 - Retirement
 - Other

Benchmarks

- Compare your business to other similar businesses.
- Lets you know where your business stands compared to others

- Capital Requirements:
 - How much money do you need?
 - What will be the purpose for funds?
 - Equipment
 - Labor
 - Purchase Land, etc.
 - What terms & rates are being used?
 - Can you afford the debt schedule?

Start-Up Financing Options

- -Less than 3 years
- -No significant credit issues

Beginning Farmers and Ranchers Loans

America's next generation of farmers and ranchers are supported through FSA's "Beginning Farmer" direct and guaranteed loan programs. Farm Ownership loans can provide access to land and capital. Operating loans can assist beginning farmers in become prosperous and competitive by helping to pay normal operating or family living expenses; open doors to new markets and marketing opportunities; assist with diversifying operations; and so much more. Through the Microloan programs, beginning farmers and ranchers have an important source of financial assistance during the start-up years.

While FSA is fully committed to all farmers and ranchers, there is a special focus on the particular credit needs of farmers and ranchers who are in their first 10 years of operation. Each year, FSA targets a portion of its lending by setting aside a portion of all loan funds for financing beginning farmer and rancher operations. With the single exception of the Direct Farm Ownership Down Payment Loan, the Beginning Farmer classification is not related to a type of loan program; it references a specific, targeted funding source.
